

SHERIDAN[®]

Endotracheal Tubes

SHERIDAN/HVT® Tracheal Tubes

High Volume Tapered, Low Pressure Cuff

- High volume, large diameter cuff provides positive tracheal wall seal and reduces area of tracheal wall contact
- Low pressure cuff minimizes capillary restriction
- Tapered cuff eases insertion while minimizing risk of herniation
- Oral or nasal use
- Available with Murphy Eye only
- Packaged sterile, 10 per case

HVT Murphy Eye

Cat. No.	Size I.D.	Cat. No.	Size I.D.
5-10310	5.0mm	5-10315	7.5mm
5-10311	5.5mm	5-10316	8.0mm

5-10314	7.0mm	5-10320	10.0mm

Sheridan Endotracheal Tubes offer the features needed by today's healthcare professionals, including:

- High level of tactile feedback from pilot balloon
- Thermosensitive PVC, allows the tubes to soften at body temperature
- Smooth tube tip, molded and gently cupped to minimize trauma during intubation

SHERIDAN/CF® Tracheal Tubes

Close Fitting, Low Pressure Cuff

- Close fitting, low pressure cuff for short-term surgical intubation
- Close fitting, opaque cuff eases intubation and increases visualization
- Oral or nasal use
- Available in Murphy or Magill style
- Packaged sterile, 10 per case

SHERIDAN PREFORMED™ Tracheal Tubes

- High volume, large diameter cuff for positive tracheal wall seal.
- Low pressure cuff minimizes capillary restriction
- Bold marks at the center of bend with distance to distal tip indicated
- Cuffed tubes available with Murphy Eye only
- Uncuffed tracheal tubes have two Murphy Eyes for enhanced patient safety
- Packaged sterile, 10 per case

5-12409	4.5mm
5-12410	5.0mm

NAZ-AL™ Tracheal Tubes

- High volume tapered, low pressure cuff
- Distinctive translucent white color
- Inflation take-off point positioned close to connector end for patient comfort
- Wall thickness minimizes risk of kinking
- Packaged sterile, 10 per case

NAZ-AL Tracheal Tubes are constructed of a special PVC blend with enhanced softness for nasal intubation and feature a soft atraumatic tip.

Cat. No.	Size I.D.
5-19010	5.0mm
5-19012	6.0mm

5-19015	7.5mm
5-19016	8.0mm

LAR-A-JECT® Reinforced Laryngectomy Tracheal Tubes

- Special "J" shape for convenient placement through a tracheostomy stoma
- Spiral stainless steel reinforcing wire within tube wall reduces risk of kinking
- Anesthesia circuit connection is out of surgical field during operations on larynx and trachea
- High volume, low pressure, distinctive blue cuff
- Smooth, angled tip for ease of insertion
- Packaged sterile, 5 per case

Cat. No.	Size I.D.
5-11714	7.0mm
5-11716	8.0mm
5-11718	9.0mm

EZ-ENDO™ Tracheal Tubes

- Sheridan/HVT, cuffed, high volume, tapered endotracheal tubes with stylets
- Packaged sterile, 10 per case

EZ-Endo Tubes are pre-loaded with intubating stylets

- Preloaded stylets have large, secure handles

Cuffed HVT

5-22410	5.0mm
5-22411	5.5mm

SHERIDAN LTS™ Tracheal Tubes

For Microlaryngeal Tracheal Surgery

- Small OD tube allows greater access to surgical field yet provides sufficient ventilation of patient
- Same tube length and cuff diameter as an 8.0mm cuffed tracheal tube
- High volume, yellow cuff is more visible and provides a low pressure tracheal wall seal
- Not designed for use in presence of laser energy
- Oral or nasal use
- Available with Murphy Eye only
- Packaged sterile, 10 per case

Cat. No.	Size I.D.
5-11108	4.0mm
5-11110	5.0mm
5-11112	6.0mm

SHERIDAN ETCO₂™ Uncuffed Tubes with Monitoring Lumen

- Allows CO₂ monitoring at distal tip of tracheal tube providing improved capnogram
- Packaged sterile, 10 per case

Uncuffed Oral

Cat. No.	Size I.D.
5-11404	2.0mm
5-11405	2.5mm
5-11406	3.0mm
5-11407	3.5mm
5-11408	4.0mm
5-11409	4.5mm
5-11410	5.0mm

Uncuffed Nasal

Cat. No.	Size I.D.
5-12005	2.5mm
5-12006	3.0mm
5-12007	3.5mm
5-12008	4.0mm
5-12009	4.5mm
5-12010	5.0mm

Sheridan ETCO₂ Tubes allow CO₂ monitoring and can also be used for pressure monitoring or tracheal irrigation.

- Reduces dead space by eliminating adaptor

SHERIDAN STAT-MED™ Tubes

- Medication injection port allows for rapid drug delivery directly to pulmonary system
- Oral or nasal use
- Packaged sterile, 10 per case

Cuffed Oral/Nasal

Cat. No.	Size I.D.
5-21512	6.0mm
5-21513	6.5mm
5-21514	7.0mm
5-21515	7.5mm
5-21516	8.0mm
5-21517	8.5mm

LITA™ Cuffed Tracheal Tube

For Laryngotracheal Instillation of Topical Anesthetic

- Patient tolerance of endotracheal tube is increased after administration of topical anesthesia
- Black reference bar indicates the position of uppermost opening
- High volume tapered, low pressure cuff
- Oral or nasal use
- Packaged sterile, 10 per case

LITA Tracheal Tubes allow for spray application of topical anesthetic via specially designed lumen.

Cat. No.	Size I.D.
5-20512	6.0mm
5-20513	6.5mm
5-20514	7.0mm
5-20515	7.5mm
5-20516	8.0mm
5-20517	8.5mm

SHER-I-BRONCH® Endobronchial Tubes

- Color coded bronchial and tracheal airways
- Cuff attachment points and tube tip are radiopaque
- Full scale depth marks and tear-resistant cuff
- Blue x-ray line for ease of visualization during fiberoptic scope insertion
- Each Sher-I-Bronch endobronchial tube includes an Accessory Pack, Cat. No. 5-16142, packaged separately

Left-Sided SHER-I-BRONCH

Endobronchial Tube

- Designed specifically for intubation of the left mainstem bronchus
- Packaged sterile, one per case

SHER-I-BRONCH is a double lumen endobronchial tube designed for selective one-lung ventilation.

Left-Sided

Cat. No.	Size I.D.
5-16028	28Fr
5-16035	35Fr
5-16037	37Fr
5-16039	39Fr
5-16041	41Fr

Right-Sided SHER-I-BRONCH

Endobronchial Tube

- Contains large eye for ventilating right upper lobe bronchial orifice
- Unique double cuff design increases the "margin of safety" when positioning the tube in the right mainstem bronchus
- Packaged sterile, one per case

Right-Sided

Cat. No.	Size I.D.
5-16128	28Fr
5-16135	35Fr
5-16137	37Fr
5-16139	39Fr
5-16141	41Fr

SHER-I-BRONCH Accessory Pack

Cat. No. 5-16142

Each accessory pack includes:

- SHER-I-SWIV FO™ double swivel connectors for use with fiberoptic scope
- "Y" connector
- Three special length suction catheters

SHER-I-BRONCH Suction Catheters

Special length suction catheters for use with Sheridan endobronchial tubes

- Individually packaged sterile, 20 per case

Cat. No.	Size I.D.	For Use with SHER-I-BRONCH
5-20708	8Fr	28Fr
5-20710	10Fr	35Fr
5-20712	12Fr	37Fr, 39Fr, 41Fr

SHER-I-SWIV® Double Swivel

Cat. No. 5-15301

- For use with tracheostomy and tracheal tubes
- Reduces breathing circuit drag and torque on tracheal tube and allows easy suction catheter passage with secure closure
- Strap connector for anti-disconnect security and special swivel joints reduce leakage potential
- Individually packaged sterile, 25 per case

SHER-I-SWIV/FO™ Double Swivel

Cat. No. 5-15401

- Connector for use with Fiberoptics
- Allows easy passage of fiberoptic scope while maintaining an air tight seal around scope
- Individually packaged sterile, 25 per case

FLEX-C-PAP® System

Cat. No. 5-16000

- Modified Mapleson D System with Norman elbow allows for addition of oxygen at patient connector
- Detachable 6" - 24" expandable tubing with wye for easy access to adjustable PEEP Valve and 1L breathing bag
- Valve on fixed wye connector allows clinician to dial in desired amount of CPAP
- 7 feet oxygen tubing connects Norman elbow with universal connector
- Single patient use
- Individually packaged 10 per case

The FLEX-C-PAP system may be used with SHER-I-BRONCH endobronchial tubes to perform one lung ventilation.

This product contains natural latex rubber.

LASER-TRACH® Laser Resistant Tracheal Tube

For use with CO₂ and KTP Lasers

- Clinically proven red rubber material
- Unique embossed copper foil diffuses laser energy minimizing unintended laser damage to tissue
- Atraumatic outer covering minimizes damage to mucosal surfaces and vocal chords
- C-clamp, when engaged, maintains inflation of the saline filled cuff
- Convenient female luer lock connector secures syringe to inflation line
- Overall length is equivalent to standard 8.0mm tracheal tube
- Packaged sterile, 5 per case

Pledgets provide extra protection of the cuff.

Cat. No.	Size I.D.
5-20608	4.0mm
5-20610	5.0mm
5-20612	6.0mm

This product contains natural latex rubber.

Sheridan JETTX™ Exchanger

Jet Ventilation/Tracheal Tube Exchanger

Cat. No. 5-24205

- Jet ventilation capability with the JETTX provides additional time to assess spontaneous breathing
- Luer lock adapter on JETTX can be easily attached to conventional jet ventilation devices
- Can be used for oxygen delivery
- For use with tube size 6.5 - 10.0mm I.D.
- Depth marks provide a guide for placement of endotracheal tube, without use of a laryngoscope
- Hollow to allow for spontaneous breathing
- Packaged sterile, 10 per case

Sheridan E.T.X.™ Exchanger

Endobronchial Tube Exchanger

Cat. No. 5-24105

- 100cc length provides easy exchange of endobronchial tube with a standard tube, without the use of a laryngoscope
- Unique, highly visible depth marks also assist when replacing an endobronchial tube
- For use with 35 Fr - 41 Fr SHER-I-BRONCH endobronchial tubes
- Hollow to allow for spontaneous breathing
- Packaged sterile, 10 per case

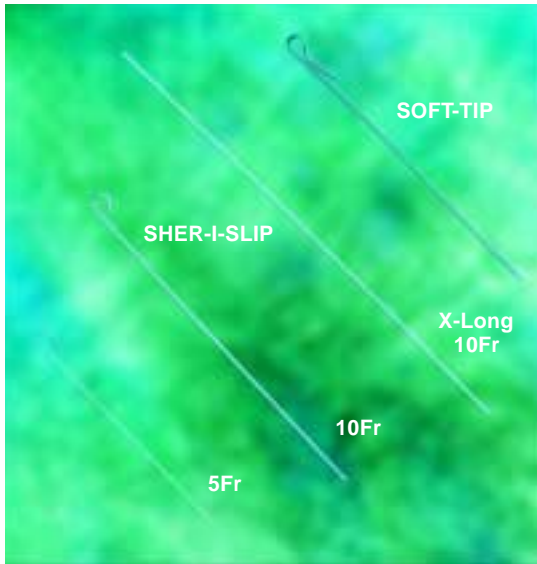

Sheridan T.T.X.™ Exchanger

Tracheal Tube Exchanger

- Allows quick and efficient endotracheal tube replacement
- Flexible for easy insertion
- Frosted surface minimizes drag
- Includes depth marks
- Hollow to allow for spontaneous breathing
- Packaged sterile, 10 per case

Cat. No.	For Tube Sizes	Length
5-24000	2.5mm - 4.0mm ID	56cm
5-24002	4.0mm - 6.0mm ID	81cm
5-24004	6.0mm - 8.5mm ID	81cm
5-24006	7.5mm - 10.0mm ID	81cm

SHER-I-SLIP® Intubating Stylet

- Special material reduces stylet-to-tube friction

Cat. No.	O.D. Size	For Tube Sizes (mm) I.D.	Length
5-15101	10Fr	5.0 - 10.0	34cm
5-15102	5Fr	2.0 - 4.5	25cm
5-15103	10Fr	5.0 - 10.0	X-Long

SOFT-TIP Intubating Stylet

Cat. No.	O.D. Size	For Tube Sizes (mm) I.D.	Length
5-15100	14Fr	8.0 - 10.0	31cm
5-15110	10Fr	4.5 - 7.5	33cm
5-15120	6Fr	2.5 - 4.5	27cm

SHER-I-SLIP Intubating Stylets are designed to retain the desired curve during oral intubation.

- Individually packaged sterile, 25 per case

SOFT-TIP Intubating Stylets feature soft, low friction sheath that extends beyond tip.

- Individually packaged sterile, 20 per case

Safety Stylet

- Low friction PVC coating provides easy removal from the tube
- Packaged sterile, 100 per case (20 per box/5 boxes per case)

Adult Safety Stylet

Cat. No. S1000

- Recommended for use with adult endotracheal tubes, size 6.5mm to 10.0mm. May be used down to 4.0mm at physician's discretion.

Child Safety Stylet

Cat. No. S5000

- Recommended for use with endotracheal tubes, sizes 2.0mm to 3.5mm.

Safety Stylets offer unique features in a convenient economical package.

- Cap end ensures guide does not advance beyond end of the endotracheal tube

Endotracheal Tube Holder

Cat. No. 1065

- Keeps endotracheal tube in place without applying tape to patient's face.
- Tube may be attached to holder using either tape or safety pin
- Supplied with cloth tie (for securing the holder), safety pin and soft foam mouth cushion
- Individually packaged 10 per case

Mouth Cushion

Cat. No. 1066

- Replacement cushions for use with Cat. No. 1065 endotracheal tube holder
- Packaged 50 to a case (10 to a bag/5 bags per case)
